PROFESSIONAL SUMMARY

DevOps Engineer and CS student with hands-on experience in CI/CD automation, cloud infrastructure (AWS), containerization, Kubernetes orchestration, and DevSecOps. Skilled in Terraform, Jenkins, Docker, and Prometheus. Proven ability to reduce deployment time and integrate security into delivery pipelines.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, IAM, VPC, Lambda, CloudWatch), Azure (Basics) || Containers & Orchestration: Docker, Docker Compose, Kubernetes, Helm

CI/CD: Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD | IaC: Terraform, AWS CloudFormation

Monitoring: Prometheus, Grafana, ELK Stack | Security: Trivy, SonarQube, OWASP Dependency Check

Scripting & Languages: Python, Bash, YAML, JSON | Databases: MySQL, PostgreSQL, MongoDB, Redis

Networking: TCP/IP, DNS, Load Balancing, Nginx, Apache | OS: Linux (Ubuntu, CentOS), Systemd, Cron Jobs

PROJECTS

CI/CD Pipeline Automation github.com/sujeetv-125 Jenkins / Docker / GitHub Webhooks / AWS EC2

- Designed and implemented a full CI/CD pipeline using Jenkins and GitHub webhooks for automated build, test, and deployment workflows.
- Containerized a Node.js application using Docker and deployed on AWS EC2 with zero-downtime rolling updates; reduced manual deployment time by ~70%.

Microservices URL Shortener github.com/sujeetv-125 Kubernetes / Docker / FastAPI / Helm / Nginx

- Orchestrated a multi-service application (frontend, backend, database) on Kubernetes using Helm charts; configured HPA for auto-scaling based on CPU utilization.
- Set up Nginx Ingress controller for external traffic routing across microservices.

Infrastructure Provisioning with Terraform Terraform / AWS / Bash Scripting

- Provisioned complete AWS infrastructure (VPC, subnets, EC2, RDS, S3) using reusable Terraform modules with S3 remote state and DynamoDB locking.
- Automated dev/staging/prod environment spin-up using Terraform workspaces and variable files, eliminating manual setup.

DevSecOps Pipeline: Netflix Clone github.com/sujeetv-125 Jenkins / Docker / K8s / Trivy / SonarQube / Prometheus / Grafana

- Built an end-to-end DevSecOps CI/CD pipeline integrating Trivy, OWASP Dependency Check, and SonarQube quality gates into Jenkins; deployed on Kubernetes on AWS EC2.
- Implemented full observability with Prometheus and Grafana to monitor pipeline metrics, pod health, and real-time system resource utilization.

EDUCATION

B.Tech in Computer Science & Engineering 2023 – 2027 (Expected)

Government Engineering College, Palamu — Jharkhand, India

CERTIFICATIONS

- Docker Essentials: A Developer Introduction — IBM / Coursera (Apr 2026)
- KodeKloud Engineer – Kubernetes (Mar–Apr 2026) | KodeKloud Engineer – Linux (Jan–Feb 2026) | LFS101 – Linux Foundation (Nov 2025)

ACHIEVEMENTS

- Solved 100+ DSA problems on LeetCode and GeeksforGeeks;
- built a functional AI chatbot within 24 hours at a national-level hackathon.
- Active open-source contributor to DevOps tooling projects on GitHub.
